

MAKERSPACE PROJECT: Gift Box

TIME: 1 Hour

SKILL: Beginner

EQUIPMENT: Sizzix Big Shot Plus

Create a custom gift box using a few sheets of paper!

MATERIALS YOU NEED TO BRING:

Ribbon or Tulle

Glue & Scissors

Cardstock in 3 colors (Decorations)

1 Piece Construction paper (Box)

MATERIALS PROVIDED IN THE MAKERSPACE:

Sizzix Big Shot Plus & Boards

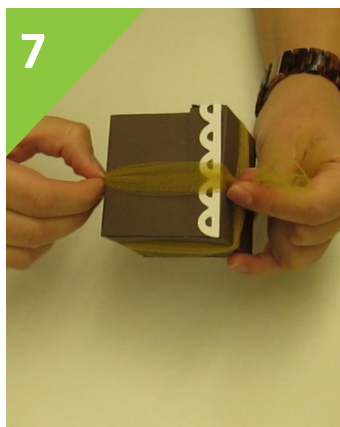

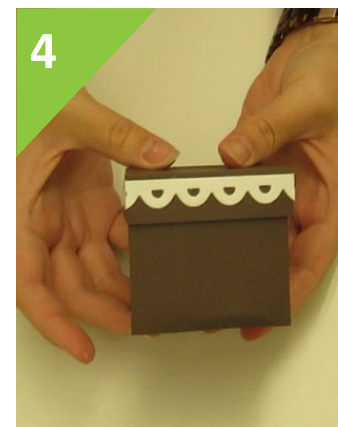

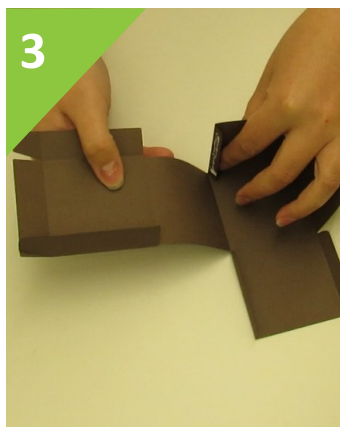

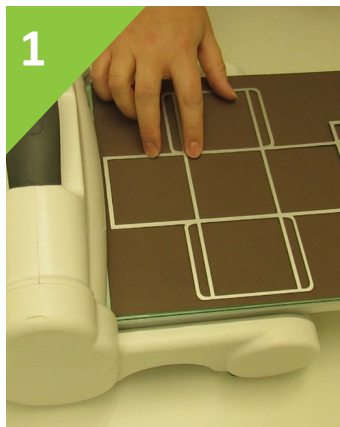

Sizzix Thinlits in: Box, Flower, Trim

Sizzix Bigz L Die : Leaf & Flower

TIPS:

- Letting the glue get a little tacky before sticking pieces together, will help them adhere to each other better.

Project Steps

1. Assemble your "Sandwich" layers by following the Sizzix directions for cutting out the Thinlit Box die and run it through the Big Shot Machine. Gently remove your cut-outs from the dies .
2. Repeat for the White Trim & White Flower, the Purple Flower, & the Green Leaves.
3. Assemble Your Box. Fold along the lines marked on the cutout. Add a small amount of glue to each tab around the box & adhere the sides together. Let glue dry for a few seconds.
4. Glue the White trim around the top edge of the box.
5. Prepare your decorations. It is optional to leave your cutouts flat if that is the look you are going for or use a rounded edge and a soft surface to create a more 3D effect.
6. Glue the Flowers together.
7. Add in your gift then finish decorating by tying your box closed with a piece of tulle or ribbon.
8. Glue on the decorations.
